

ECLIPSE SERIES ES-55

5 SPEAKER HOME THEATRE SYSTEM

OUR NEW CONCEPT

A Home Theatre system that is ultra modern. This system has been painted in Polyurethane black piano

in the top sealed chamber. This 3-way speaker system gives you extended bass response, clear vocals and crisp highs. Comparing these

ECLIPSE SERIES ES-55 5 SPEAKER HOME THEATRE SYSTEM

finish and fitted with Accusound Drivers that deliver unbelievable bass with movies and Music.

speakers to other brands you will hear deeper more defined bass, definition in the vocals and highs. The ES-55 Front Speaker is fitted with Bi-Wiring connections for the enthusiast.

THE ACCUSOUND ES-55 has huge power handling capacity of 150 watts and will suit all the new Digital receivers, handle the extended frequency response delivered by DVD players and the latest software.

ES-55 CENTRE SPEAKER
The centre is a very important part of a Home Theatre system. It has to deliver clear speech but still give you good bass and treble. On Dolby Pro-Logic, Dolby Pro-Logic II, Dolby Digital and DTS the speech comes mainly from the centre speaker. The ES-55 centre

ES-55 FRONT SPEAKERS
The front speakers have two 145mm drivers in the lower inner ported chamber with a 145mm mid / bass driver and a 25mm Soft Dome Tweeter

delivers clear detailed speech, good vocals from music and bass effects from movies. It is fitted with two 145mm Mid/bass drivers and a 25mm Soft Dome Tweeter. This speaker is "Shielded" against colour distortion transmitted from the magnets to your TV tube.

ES-55 REAR SURROUND SPEAKERS

The rear speakers are fitted with a 145mm driver and a 25mm Soft Dome Tweeter. This speaker has been designed to give you all the effects from movies and still give you detailed sound from music on DVD, Video, FM and CD's. Many new receivers have an "all channel stereo mode" for CD's. The ES-55 rears can handle the frequency response and power created in this mode.

ES-55 POWERED 150 WATT SUBWOOFER

The ES-150 Subwoofer gives you low frequency effects from movies and added deep bass that no front speaker can deliver at normal levels for music. The ES-150 has a built in "Low End Drive" amplifier with volume, frequency, and phase controls. It also has an "Auto" on/off standby switch, which enables it to turn on automatically when a signal is delivered and turn off again after 20 minutes when no signal is delivered. It comes with a low level input to connect straight to your home theatre receiver. The ES-150 has a front firing bass driver and a 200mm down firing Passive Radiator. This design eliminates the high volume of air passing through plastic tubes that cause "choofing".
