HD SERIES ONE

5.1 HOME THEATRE SPEAKER SYSTEM

Front Speakers

The Accusound HD Series One floor standing speakers are fitted with 2 x 200mm bass drivers using new cone material and new rubber surrounds. The horn loaded soft dome tweeter is mounted between to 2 woofers in time alignment and the speaker terminals are bi wired. Many good new receivers now have Bi Amp facilities so you can run 2 sets of speaker wires, 1 set to the horn loaded tweeter and 1 set to the bass drivers using 2 extra amplifiers in the receiver. This will give you much cleaner sound. The speaker box is fitted with internal bracing to stop any vibration and an overload protection system. They are rated at 200 watts continuous power. The speaker box is finished in Piano black. The speakers come with screw in spikes for carpet floors or rubber feet for tile or wooden floors.

ACCUSOUND HD

HD SERIES ONE 5.1 HOME THEATRE SPEAKER SYSTEM

Bi Wire Terminal

The Accusound brand has been in existence for a number of years, having been launched back in 1990.

It continues to receive recognition from both domestic and overseas markets for its outstanding range of speakers. Proudly Australian owned and operated.
