HD SERIES ONE
5.1 HOME THEATRE SPEAKER SYSTEM

Wireless Ready Powered Subwoofer

The Accusound HD Series One subwoofer is a masterpiece in design and sound. This subwoofer is 350 watts of real power. The frequency response is 19Hz -200Hz and the sub is fitted with a 250mm long throw woofer. The amplifier has high power outputs. We have increased the voltage specs to handle all high voltage from mains. The subwoofer has a volume control, 0-180 degree phase shift, a crossover from 40-200 Hz and a auto/on switch. The sub can be converted to wireless with an Accusound HD Series One Transmitter. If you have a large room and find it hard to run a subwoofer cable, turn your subwoofer into wireless. You can purchase the transmitter directly from Accusound for a cost of \$200.00 delivered anywhere in Australia. We set the transmitter frequency to your subwoofers serial number. This subwoofer will give you all the effects from movies and great solid bass for music.

ACCUSOUND HD

HD SERIES ONE

5.1 HOME THEATRE SPEAKER SYSTEM

Subwoofer Wireless Transmitter

The Accusound brand has been in existence for a number of years, having been launched back in 1990.

It continues to receive recognition from both domestic and overseas markets for its outstanding range of speakers. Proudly Australian owned and operated.
