

SA100

SIGMA SERIES

5.1 HOME THEATRE SPEAKER SYSTEM

WIRELESS

The Sigma Series SA100 Wireless is a new era in home entertainment. Now you don't have to run wires through the ceiling or floor for your rear speakers. Just plug in to the power, sit back and enjoy the performance. The sculpted black piano finish enclosures look awesome flanking your flat screen television. High tech materials ensure superior performance delivering rich, full bodied, big speaker sound from a beautiful compact design.

Front Speakers

These stylish curved SA100 speakers are made from non-resonant medium density fibre-board.

The curves break up internal standing wave resonance for pure life like sound. The speakers feature 2 x 75mm high performance paper cone bass drivers and a 25mm soft dome tweeter.

The performance of upper bass, midrange and top end response will astound you.

Centre Speaker / Transmitter

The SA100 centre produces clear speech. You will be able to hear every word at high or low volume. The SA100 centre also has the wireless transmitter built in. The transmitter plugs into your Home Theatre Receiver via the rear speaker connections. The transmitter sends the signal to the rear speakers. This system runs on 2.4MH and has 8 channels to choose if you have cordless house phones or wireless internet which can cause interference.

SA100 SIGMA SERIES

5.1 HOME THEATRE SPEAKER SYSTEM

Rear Wireless Speakers

The rear wireless speakers each have a built in amplifier. This produces the sound that is received from the transmitter. Each rear wireless speaker plugs into the power. If you don't want to run wireless, the rear speakers have terminals to use as normal wired rear speakers.

Powered Subwoofer

Designing subwoofer to match satellite speakers is a hard task. You have to match your lower frequencies so the subwoofer takes over where the smaller speaker's lower frequencies finish. The SA100 subwoofer does this with a 250 watt amplifier built in to the subwoofer. This power gives you all the bass you require for movies and music.

SA100 WIRELESS SPECIFICATIONS

Model	Frequency Response	Power Watts RMS	Sensitivity 1w@1m	Rated Impedance	Bass Drivers	Tweeter	Dimensions HxWxD	Weight kg's
Front	125-20000Hz	120	88 db	8 Ohms	2x75mm	1x25mm	1000x130x136	7
