

# SA1400

## SIGMA SERIES

5.1 HOME THEATRE SPEAKER SYSTEM

## Hear it-Feel it

Accusound's new SA1400 Home Theatre System has been designed to play with all digital receivers on the market from entry level to high quality, high output models. It will play both movies and music in 5.1 Dolby Digital, DTS or Stereo. The drivers have rubber rolled surrounds and our tweeters are soft dome. This will give you years of trouble free service. Accusound's new SA1400 Home Theatre System has been designed to play with all digital receivers on the market from entry level to high quality, high output models. It will play both movies and music in 5.1 Dolby Digital, DTS or Stereo. The drivers have rubber rolled surrounds and our tweeters are soft dome. This will give you years of trouble free service.

### Front Speakers

The front speakers have a single 165mm driver and a 25mm Soft Dome Tweeter. The front speakers give extended bass response, clear vocals and crisp high frequencies and will handle the extended frequency response produced by the latest DVD's.

### CENTRE SPEAKER

We have developed this centre to give perfect vocals. The centre speaker in a home theatre system is designed so you should hear every word that is spoken in a movie or sung in music. At Accusound we control the frequencies to enhance the vocal range.

5.1 HOME THEATRE SPEAKER SYSTEM

## Rear Surround Speakers

Rear speakers are designed to deliver effects from movies and vocals and instruments from music. The rear speakers fill the room with sound. Both rear speakers are fitted with hanging clips so you can mount the speakers on the wall. You can buy additional single rear speakers for 6.1 or 7.1.

## Powered Subwoofer

The SA1416 powered subwoofer adds low frequency effects that are sent to the subwoofer in a separate channel from the DVD. Using CD, FM or video signals the receiver sends low frequency signals to the subwoofer. It has its own 150 watt amplifier built in. There are controls for volume, crossover frequency and phase. The sub also has a power switch with a separate standby switch to run in auto on mode. This enables you to turn to auto so the sub will turn off when you are not using the system or keep in on in low passages of movies or music. This SA1400 system is available in Black finish and comes with a 3 year parts and labour warranty.

## SA1400 Home Theatre Specifications

Model	Frequency Response	Power Watts RMS	Sensitivity 1w@1m	Rated Impedance	Bass Drivers	Tweeter	Dimensions HxWxD	Weight kg's
